

## ASRY's Covid-19 Precautions

V10 – 27-Apr-20

1. Every person entering ASRY is scanned at the gates for a fever, with any person with a temperature over 37.4°C immediately escorted to ASRY Medical Centre where they are subject to the nationally-defined procedure mandated by the Ministry of Health.
2. Permission for a vessel to come alongside and/or dock in ASRY will be granted after clearance from the Bahrain Ports & Maritime Authority (PMA).
3. At Inner Anchorage, ASRY medical team will board vessels and conduct medical screening of all personnel on board, before being granted permission to enter the yard.
4. Once a vessel arrives alongside/docked, and upon confirmation that sufficient Covid-19 precautions have been taken by crew onboard during the previous 14 days, works may begin.
5. All persons within ASRY, including crew, technicians, engineers, superintendents and ASRY personnel, must abide by the following rules:
  - Masks are to be worn by every person while at work, or in public places.
  - All persons must maintain distance of 2 metres between each other.
  - Meetings of more than 5 people are forbidden, and only essential meetings are permitted, and only for essential attendees.
  - Anti-spreading behaviors to be strictly observed at all times, including hand hygiene measures such as regular hand-washing, and no face-touching
  - Relevant PPE requirements to be strictly adhered to in all operational areas

6. All applicable ASRY departments have split into separate teams, which are rotating between working-remotely and working-in-office, in order to reduce viral spreading, and also provide operational back-ups.
7. All employees returning from vacation must undergo mandatory screening process in ASRY Medical centre before their ID card is reactivated.
8. All overseas travel has been prohibited for all employees.
9. Yard wide awareness tool-box talks regarding actions to limit spreading of the virus are taking place on a revolving continuous daily basis.
10. Yard wide awareness visual campaign regarding actions to limit spreading of the virus has been rolled out yard-wide, with continuous updating.
11. Facilities to reduce viral transmission have been procured - hand sanitiser machines installed in every building and all common areas.
12. All working areas within ASRY are being disinfected and sanitised on a rolling and regular basis.
